

## Design-Covers for HL053M(P)-series

### Change of thickness from 8mm to 6mm

#### Product description

In the future all design covers of HL053M(P)-series will be delivered with thickness 6mm. Advantage: it is possible, to use flatter tiles. These changes have no influence on design, function or stability. All „standard“-covers (HL053S-series) remain unchanged. This switch will be performed fluently.

#### Differences to the old version:

##### Cover

- 6mm Thickness without swallow-tail (old: 8mm)
- Cut-out for the middle sector: 266mm x 41,5mm (old: 257,5mm x 38,5mm)

##### Middle sector

- Size 286mm x 44mm x 5mm (old: 262mm x 43mm x 8mm)
- Spare part HL053M(P)/1.EN

##### Black frame

- Fixing with a clip from the top (old: fixing from below) - s. picture above
- Tile height 10 – 32mm (old: 12 - 32mm)
