

## Infosheet

### HL9/7/8 socket connector DN75 plastic/ DN80 cast iron

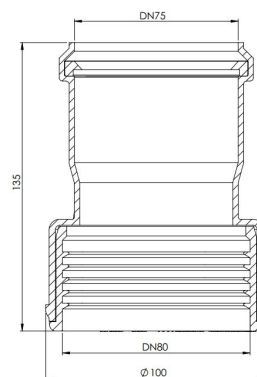

Our range of socket connectors and adapters will be expanded by one more product. Additionally to the HL9 –series we now have the HL9/7/8 suitable for the connection of DN75 plastic pipes and DN80 cast iron pipes.

In the last couple of years more and more producers stopped the production of DN70 cast iron pipes and instead changed to DN80 pipes. We reacted to this development and added the DN80 to our collection of current socket connectors (DN50, DN70, DN100).

HL9/7 will still be available in the future.
