

HL2.2

Appliance hose twin connector for washing machine and clothes dryer with non-return valve

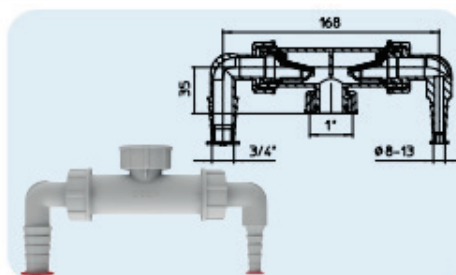

The new appliance hose twin connector HL2.2 is basically identical to the proven HL2. Compared to the HL2, the new HL2.2 has not two HL19, but combines one HL19 appliance hose connector (1" x hose connector 3/4") for the connection of a washing machine as well as one HL19.2 appliance hose connector (1" x hose connector 8–13 mm) for another device, e.g. clothes dryer.

HL2.2 Double hose connector with backwater valve
