

HL522.3

Color modification of the Cover plate (white d=112mm)

The color of our cover plate HL522.3 has been adjusted to ensure compatibility with the color „Alpinweiß“ used by Kaldewei. The modification provides a closer visual alignment in combined applications.

From now on, the cover plate will be available in RAL9003 instead of the previous RAL9010.

Below you can see a comparison of the two color variants of the cover plate.

Available from: From now on
